

iNetRadio

What You Want, When You Want It

FOR IMMEDIATE RELEASE: ANNOUNCING THE LAUNCH OF INETRADIO

February 14, 2011 – iNetRadio is the *ultimate* in internet radio, combining a wide selection of music channels with instant access to news, weather, sports, and virtually any other program. It's all together in one versatile player so there's no need to search the net for content, save a lot of sites as favorites, or download a different app for each site.

iNetRadio is available as a free app and as a player for desktop or laptop computers. Users enjoy a complete selection of information and entertainment, including:

- Dozens of popular music channels
- The latest world and national news
- Up-to-date weather forecasts
- Podcasts covering a wide variety of sports
- Special lifestyle features and tips
- Informative and entertaining talk shows

iNetRadio also provides a seamless listening experience. For example, a user can select a newscast at any time while listening to anything from big band standards to today's top hits. After the news, iNetRadio automatically returns to the music at the start of the next song.

Half a century of evolution.

The future of radio arrives...
